information that will remain within ibex gale databases, access logs, and other historical internal records, which may or may not contain such personally-identifiable information.

The information we may gather

Non-personally-identifiable information: as a standard practice, ibex gale assigns a random number to each user for anonymously tracking content preferences and traffic patterns. This random number lets us keep track of "how many" times users are doing specific things - like visiting our site each month - without really knowing who those users are (unless they specifically tell us). We analyse this data for trends and statistics, such as which parts of our site users are visiting and how long they spend there. We also gather information about what users are searching for. We use all this information in order to improve our content, plan site enhancements, and measure overall site effectiveness.

Personally identifiable information: in certain areas of this site, we require that you provide us with personally identifiable information, in order to be able to use that portion or those portions of this site. If you submit a request for more information from us, the information you submit will only be used by ibex gale. Our lists are private and are never sold to any third parties.
